

Adaptable and analytical IT Engineering undergraduate with skills in full-stack development, programming, and AI/ML technologies. Eager to apply technical expertise and problem-solving abilities to develop efficient, innovative solutions, contribute effectively to organizational goals, and create meaningful value.

EXPERIENCE

AI Software Developer Intern (Dec 2025 – May 2026 \ 6 Months)

IT Mines Technologies Pvt Ltd – Thane

- **Developed** a Python-based intelligent automation solution combining **OCR, LLMs, and prompt engineering**, reducing manual effort by **95%** while transforming uneditable PDFs into editable outputs.
- **Implemented 5+ extraction and validation techniques**, including heuristic rules, field mapping, label mapping, and coordinate-based identification, achieving **90%+ accuracy** across varied layouts.
- **Streamlined 3 core workflow stages** extraction, field identification, and reconstruction supporting **unlimited fields and document instances** with minimal human intervention.

PROJECTS

Digital Menu & Ordering System

- **Developed** a QR-based digital ordering system with **3 dedicated modules Admin, Staff, and Customer**, enabling customers to scan, browse **20+ menu items**, and place orders digitally while reducing ordering time by **80%**.
- **Engineered** real-time order tracking, cart management, menu administration, and staff-side order handling using **15+ reusable React components**, streamlining coordination across all **3 modules**.
- **Automated** bill generation and **sales report generation**, providing administrators with organized transaction records and actionable business insights while minimizing manual record-keeping.
- **Planned** future integration of **AI/ML-based recommendations, predictive sales analytics, intelligent upselling, and secure online payment systems** to evolve the platform into an intelligent restaurant management solution.

Airline Ticketing System

- **Developed** a Java Swing-based airline reservation application with **2 primary workflows Admin and Passenger**, providing a centralized interface for managing flights and reservations.
- **Implemented 6+ core functionalities**, including authentication, flight management, passenger registration, ticket booking, cancellation, and ticket printing, integrated with a **MySQL database**.
- **Automated 3 key reservation operations booking, cancellation, and ticket generation**, maintaining persistent passenger and flight records and reducing repetitive manual data entry.

SKILLS

- **Programming Languages:** C, Java, Python, JavaScript
- **Frontend Development:** HTML, CSS, React.js, Tailwind CSS, Streamlit
- **Backend Development:** Node.js, Express.js, Flask, REST APIs
- **Databases:** MySQL, MongoDB, Firebase
- **Data Science / Machine Learning:** ML Python Libraries, Data Cleaning / Preprocessing, Exploratory Data Analysis, Feature Extraction / Engineering, Model Training & Evaluation
- **Artificial Intelligence:** AI/ML Fundamentals, OCR, LLMs, Prompt Engineering,
- **Developer Tools:** Git, GitHub, VS Code, AWS, Linux
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Computer Networks, API Integration
- **Soft Skills:** Problem Solving, Analytical Thinking, Communication, Teamwork, Adaptability, Time Management

EDUCATION

- **Bachelor of Engineering (Information Technology)**
Konkan Gyanpeeth College of Engineering | Mumbai University – 2027
- **HSC**
St. Xavier's College | Maharashtra State Board - 2023
- **SSC**
Maharashtra State Board – 2021

CERTIFICATIONS

- **OCI Generative AI Professional 2025** — Oracle
- **Software Engineering Job Simulation** — J.P. Morgan Chase & Co.
